intelligent home automation

The dream of home **automation** has been an elusive one; however, recent advances in wireless technology have realized that dream. Whole home control requires the seamless integration of a wide variety of products and technologies which, in the past, has resulted in expensive, awkward or unreliable solutions. Built on the outstanding products from Control4, PeakLifestyles offers complete home control and automation solutions that are **reliable, compatible** and **affordable**.

control for living

products & features

- **controllers**
the power to control and automate virtually any home function, including home theater, lighting, security and temperature affordably and unobtrusively
- **lighting**
wireless dimmers and switches that replace existing Decora style switches without additional wiring and damage to walls
- **climate**
wireless thermostats that seamlessly replace existing hardware and reliably integrate with your whole-home control
- **audio**
flexible installation options that save you money yet provide the luxury of audio throughout your home
- **keypads**
three and six button keypads that add extra control without the clutter by only taking up the space of a single light switch
- **accessories**
extra remotes, extra relays, extra contacts, a truly modular system to custom fit the needs of your home
- **touch screens**
compact size, clean lines, intuitive interface, complete home control at your figure tips: literally
